

Solution Overview:

- Enables 3G / Wi-Fi™ smartphones to become mobile hotspots
- No additional client software required to connect with a wide variety of Wi-Fi devices:
 - Laptops
 - Smartphones
 - PDA's
 - MP3 players
 - or other Wi-Fi enabled devices
- Easy to install - Simple to run
 - Over-the-air provisioning
 - Initial web-site visit to operational in less than 5 minutes
 - Single button execution
- Internet access anywhere there is mobile network coverage
- Client server architecture enforces security
- Connects via standard Wi-Fi access
- Multiple client devices can connect to a single walkinghotspot
- Energy management features preserve battery life
- Service levels enable customization
- Currently runs on 75% of 3G / Wi-Fi smartphones:
 - Symbian® S60
 - Symbian® UIQ
 - Microsoft® Windows Mobile®

Using the *WalkingHotSpot™* solution is secure, easy to setup and easy to use. This solution allows 3G / Wi-Fi™ smartphones to function as hotspots to enable multiple client devices such as laptops, MP3 players, gaming devices, and any other Wi-Fi enabled device to connect to the internet anywhere there is mobile network coverage. The solution provides seamless connectivity to client devices while enforcing the security methods required by mobile network operators (MNOs). This is all done without additional software on the client device. This scalable solution consists of multiple service level offerings for consistent user experiences across differing feature sets. Energy management is included to help to preserve battery life. Your hotspot, your rules! Fast, secure internet access when you need it and where you want it!

About TapRoot Systems, Inc.

TapRoot Systems, Inc. provides software products and services for the mobile device marketplace.
